

Criteria for returning Polyethylene (PE) Pipes and Fittings

Iplex PE pipes and fittings are 100% recyclable and can be reprocessed and manufactured into new pipes. Iplex can accept our Iplex PE pipes, offcuts and fittings and other branded pipes, offcuts and fittings that meet the AS/NZ4130 standard. Non-Iplex PE Pipes that do not meet the AS/NZ4130 standard may require a technical review and further testing of the PE pipe material before it can be accepted. If your pipes, offcuts, and fittings are slightly dirty, a light hosing should remove the dust and dirt. This applies to new and used PE pipes and fittings.

Submit a Pipeback form and we will work through this determination with you.
