

Introducing the **NEW** Pocket**ENGINEER**TM Structural Design Tool

Buried Flexible Pipe Structural Designs - **Made Simple**

The NEW PocketENGINEERTM Structural Design Tool helps customers to create and share effective flexible pipe designs. Simple to access and easy to use, customers can leverage this online tool anytime, anywhere.

Complete and Check Structural Designs against AS/NZS 2566.1

Quickly develop structural designs for buried flexible pipelines, saving users time and simplifying complexity.

Access extensive Iplex Pipe Product Data Library

Select key pipe product data from the extensive Iplex library, or input product specific details, making design parameters simple and flexible.

Create, Save, and Share Designs

Create, save, and share designs with other PocketENGINEERTM users, allowing others to copy and check work.

Generate Design Reports

Generate design reports, checked against the requirements of AS/NZS 2566.1 providing confidence in specification.

Compare Different Design Solutions

Generate comparison reports to find the most effective and efficient solution, saving time and cost for the project.
