# IRONTITE® PN35 ZINC/ ALUMINIUM DUCTILE IRON PIPE

Ideal for potable water applications Irontite<sup>®</sup> Blue ductile iron pipe has an internal lining of cement mortar offering excellent resistance against corrosion while providing superior hydraulic performance. The cement lining creates a smooth and dense internal surface. The external coating of Zn-Al primer (mean mass 400 gm/m²) + blue liquid epoxy (min. 100  $\mu$ m DFT) protects the pipe against damaging and corrosive effects of the soil and can be buried without sleeving in soils with a resistivity greater than or equal to 500  $\Omega$  cm (soils below marine water table), or can be buried with sleeving (please check with local water authority).

The Jindal SAW manufactured pipe has a socket push-on joint (flexile jointing) with a unique EPDM gasket, clearly identifiable by the green markings on the face of the gasket, allows a quick and safe installation. Due to their high angular deviation, there is the potential to reduce the number of fittings, increasing the rate of installation.

#### **OPTIONS\***

### **Internal Lining**

Bituminous seal coat to AS/ NZS 4020

Sulphur Resistant Cement (SRC)

# Polyurethane as per EN 15655

# **External Coating**

Polyurethane as per EN 15189 (700  $\mu$ m – 2000  $\mu$ m) Zn primer (mean mass 200 gm/m²) + Bitumen coating

# **End Connections**

JSAW-LOCK Double socket full restraint joint ends with welded bead ring JSAW-MRJ – Mechanically restrained Joints

# Sizes
